Project Title: Sade Website

I plan to build this site into multiple pages that includes a simple landing page with a navigation at the top or side, and a mix of image focused and text focused pages for different sections. I think there's a lot of information to build the pages, so it'll be important to highlight the most important ones such as most notable works, etc.

- **Introduction-** A brief introduction of Sade as a musical artist and her accomplishments as well as her most notable work.
- **Early Life**
- **Discography-** list of albums released
- **Career/Stages of Music Career-** roughly broken down into decades/albums
- **Legacy and Impact-** references to artists who have been influenced by Sade
- **Personal Life**
- **Honors/Awards**
- **Tours**
- **Sources-** list of sources for photos, links, wikipedia page, etc.
